

Curcumin 400x

Revolutionary Liquid-Soluble
Curcumin*

Curcumin 400x Supplementation

Curcumin 400x is a revolutionary curcumin supplement featuring innovative BioCurc®. This patented ingredient has been shown in clinical studies to surpass the bioavailability of virtually every other curcumin/turmeric extract product on the market.¹

Curcumin is a key curcuminoid found in turmeric that has been shown to have a myriad of health benefits, such as supporting immune function, easing stress, relieving minor joint discomfort, reducing muscle soreness from exercise, aiding digestive function, and much more.*

The problem with most curcumin supplements and turmeric extracts is that the biologically active curcuminoids are normally not well-absorbed, resulting in minimal benefit (if any at all). Curcumin 400x is one of the first curcumin supplements to feature the revolutionary BioCurc® ingredient, which has vastly superior pharmacokinetic properties (meaning your body can actually utilize the curcumin).

BioCurc® stands as the forerunner of curcumin ingredients currently on the market, exhibiting significantly greater absorption and bioavailability than other curcumin and turmeric extract supplements. As such, regular use of Curcumin 400x may provide a multitude of benefits, including:

- Support for the immune system*
- Help with minor joint discomfort*
- Relieve exercise-induced muscle soreness*
- Support proper stress management and relaxation*
- Powerful antioxidant activity*
- Helps maintain blood sugar in the normal range*
- Helps maintain blood lipids in the normal range*
- Assist digestive function*

How Curcumin 400x Works

Turmeric, a perennial plant belonging to the ginger family, gives curry dishes their distinctive spicy taste and golden color. The root of the plant has been used in traditional medicine throughout Asia for thousands of years as it contains therapeutic compounds called curcuminoids. Curcuminoids, especially curcumin, act as powerful antioxidants in the body.^{♦2}

Research suggests that curcumin has ubiquitous roles in the body, affecting many vital processes.³ For example, curcumin has been shown to support healthy heart, immune, brain, joint, and digestive functions.^{♦4}

What makes Curcumin 400x stand out is that it features a preeminent form of curcumin—BioCurc®.

Clinical results indicate that BioCurc® exhibits better absorption and greater bioavailability than Theracurmin®, Meriva®, BCM-95®, C3 Complex®, CurcuWIN®, Longvida®, Cavacurmin®, CurQfen®, HydroCurc™, Acumin™ (Cureit™), and MicroActive Curcumin®.¹

In fact, 400 mg of BioCurc® is equal to 2,000,000 mg of turmeric and 45,000 mg of 95% curcumin extracts.¹

Supplement Facts

Serving Size: 2 Softgels
Servings Per Container: 30

	Amount Per Serving	%DV*
Calories (energy)	10	
Total Fat	1 g	1%*
BioCurc® (rhizome extract; <i>Curcuma longa</i>)	800 mg	**

Other Ingredients: Softgel (gelatin, sorbitol, glycerin, purified water, carob), coconut oil.

Contains: Coconut

Directions: Take two softgels daily or as directed by your healthcare practitioner.

Caution: If you are pregnant, nursing, or taking medication, consult your healthcare practitioner before use. Keep out of reach of children.
